

Help Us Get the Lead Out

The US EPA has changed the Lead & Copper Rule after the lead contamination in Flint, Michigan. We are taking inventory of every service line in our system to identify any lead service lines and achieve a lead-free water utility. We need your help to complete an online survey to identify the material of your water line. We will give you a \$5.00 credit on your water bill as a thank you. You can request a paper copy by calling (270) 439-4646.
